Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Claim 1 was discussed in view of the prior art of record. The claim limitations concerning the table setting section and the transfer section were discussed. More specifically the feature of the table including a radio connection identifier to identify a channel through which content is sent and received between the mobile terminal and the relay apparatus. Hurta et al. at least at 0186-disclose a relay having a table that includes an operator identifier. The examiner is interpreting the radio connection identifier to be distinct from an operator identifier. The examiner will further consider the applicant's arguments to be filed in response to the previous Office Action and at that time the search will be updated based on the claims of record .
